✉ uyenthi30604@gmail.com ☎ 0382911981 📍 Binh Duong, Vietnam

🔗 Summary

Web Developer with 2.5 years of experience developing Enterprise Resource Planning (ERP) solutions that improved operational efficiency and user experience. Successfully contributed to system design, API development, and user interface improvements. Looking to apply my skills to deliver scalable software solutions and drive innovation at your company.

📁 Professional Experience

Maruei Vietnam Precision

04/2022 - 09/2024

Intelligent Factory System (IFS) Engineer

Binh Duong

- Designed, developed, and maintained software systems to improve functionality and meet business requirements.
- Collaborated with teams and stakeholders to identify business needs, translating them into technical specifications and actionable solutions.
- Played a key role in the full development cycle, from coding to debugging and testing.
- Participated in weekly meetings to track project goals and milestones, resolving challenges proactively.
- Wrote detailed documentation for source code, system workflows, and user guides to support both internal teams and clients.
- Analyzed client feedback to implement improvements that optimized system efficiency and user experience.
- Developed RESTful APIs and applied OOP principles to create scalable and maintainable solutions.
- Utilized Git for version control to manage source code repositories and ensure efficient collaboration.

🎓 Education

Bachelor of Communications and Computer Networks

10/2016 - 01/2022

Eastern International University

Binh Duong

GPA: 3.59
